Quantity Field Seed Price List

The Western Seed Co.

DENVER, COLO.—FEBRUARY 22, 1940

Prices herein are today's values and subject to change without notice.

OUR TERMS ARE STRICTLY CASH WITH ORDER—F. O. B. DENVER, COLORADO.

Quantity prices will be allowed on assorted orders. If your order totals 500 lbs. use the 500 lb. price on each variety; if it totals 1000 lbs. apply the 1000 lb. price, and so on.

THE WESTERN SEED COMPANY GIVES NO WARRANTY, EXPRESS OR IMPLIED, AS TO DESCRIPTION, QUALITY, PRODUCTIVENESS OR ANY OTHER MATTER OF ANY SEEDS THEY SEND OUT, AND WILL NOT BE IN ANY WAY RESPONSIBLE FOR THE CROP.

Seed has been treated with Semesan Jr.

606 is suitable for Northeastern Colorado. Kernels are medium flats.

570 is suitable for Northeastern Colorado. Can furnish medium and large flats.

170 is suitable for higher altitudes in Colorado and in Wyoming. Kernels are large flats.

On irrigated lands use Minnhybrids 401 and 403 and Wisconsin 570. Medium and large kernels available on these.

625 and 680 are suitable for silage and planting in southern Colorado. Medium flat kernels.

COLORADO CUSTOMERS—Do not fail to include Sales Tax ON ALL TAXABLE ITEMS.

SEMESAN JR. By all means treat your field corn. Semesan Jr. possesses properties that benefits both good and diseased seed. Is a preservative against rotting in cold, wet weather; checks seedling blight; increases germination; invigorates growth; develops sturdier growth and promotes earlier maturity; in addition to which it improves the quality and increases the yield. 2-oz. per bushel.

GRANULAR "AERO" CYNAMID

Granular "Aero" Cynamid is an air-nitrogen product in which nitrogen plant food is combined with soil-improving lime. Contains 21% nitrogen and 70% hydrated lime. Its non-leaching nitrogen, its hydrated lime and its partial sterilizing effect on the soil when used liberally, are very important supplemental characteristics.
(100-Lbs... \$2.75) (1000-Lbs..\$25.50) (Ton..\$50.50)

"AMMO-PHOS" 11-48-0

Two plant foods in one material. Contains 11% nitrogen and 48% available phosphoric acid. Effective for small grains, clover and alfalfa; useful as top-dresser for pastures; gets row crops off to a quick start.
(100-Lb... \$4.25) (1000-Lb...\$41.00)

See Page 74 of Catalog for Fertilizer elements.

SEED TREATMENT

Smut in Barley: For Stripe and Covered Smut add 1 pint Formaldehyde to 30 gallons water (Not Heated). Soak seed for three hours.

For COVERED SMUT on HULLESS BARLEY, dust with Copper Carbonate, 2 to 4 oz. to bushel of grain.

SMUT IN OATS: For Loose Smut and Covered Smut add 1 pint Formaldehyde to forty (40) gallons of water and sprinkle on 40 bushel grain. Cover with sacks or canvas for two to four hours.

BUNT or STINKING SMUT IN WHEAT: Dust seed grain with Copper Carbonate, 2 to 4 ounces to the bushel, or Copper Carb, using 4 to 6 oz. per bushel. Mix in a barrel mixer so that all grains are covered with the dust. Treatment can be made at any time and grain can be stored without injury.

For CONTROL of KERNEL SMUT in SORGHUMS, add 1 pint of Formaldehyde to 30 gallons of water. Soak seed 1 hour and dry, or dust with Copper Carbonate, 2 to 4 ozs. to bushel.

For CONTROL of SMUT on MILLET, soak the seed 2 hours in Formaldehyde, 1 pint to 45 gallons of water. Copper Carbonate also effective.

SEED TREATING CHEMICALS priced on Page 71 of Catalog.

CONTROLLING OX WARBLE

OX WARBLE is most easily controlled when the maggots are in the backs of the cattle. Rotenone has been found to be successful and economical. Treatments should begin as soon as the lumps appear under the skin. We recommend 4 Pints Berako Penetrant Rotenone to 10 gallons of water applied liberally as a wash to the backs of infected cattle. This is approximately enough for 80 cows.
Gallon Cans..... \$4.00 Each

WEED BURNER

We recommend Dobbins No. 210 Superbilt Flame Sprayer. It burns, heats, disinfects and sterilizes and has many uses throughout the year. 4-gallon capacity burns kerosene, distillate or stove oil. Balanced handle design for ease and comfort in operation. Weight 16½ pounds. \$15.35 each. See Page 76 of Catalog.

CORONA FIRE EXTINGUISHERS..... \$2.00

You may prevent a serious fire in your home or buildings by having a Corona Fire Extinguisher in each spot where danger lurks.

Chemicals for Treating Seed

NEW IMPROVED SEMESAN BEL

For Seed Potatoes—

1 lb. to $7\frac{1}{2}$ gal. Water treats 60 to 80 bushel. Just immerse thoroughly and take potatoes out.

4 oz. 45c 1 Lb... \$1.50 5 Lbs... \$6.50 25 Lbs... \$30.00

BLUE VITRIOL

5 Lbs.... 65c; 10 Lbs.... \$1.25; 25 Lbs... \$2.75

FORMALDEHYDE

For Millets, Sorghums, Seed Potatoes—Hot Treatment—temperature 120 to 125 degrees. 1 pint to 30 gallons of water treats 30 to 50 bushels. Treatment—3 minute immersion. 1 Lb.... 40c; 6 Lbs.... \$1.80

CORROSIVE SUBLIMATE

(Bichloride of Mercury)

For Seed Potatoes and Vegetable Plants—A deadly poison. 4 oz. to 30 gallons of water treats 8 to 12 bushel. Immerse for $1\frac{1}{4}$ to 2 hours.

$\frac{1}{4}$ Lb.... 61c 1 Lb.... \$2.09

COPPERCARB—(18% to 20% Copper)

Smut Spores in Wheat are easily killed.

5-lb. Cartons (6s).....	Each \$.90
30-lb. Case.....	Each 4.75

COPPER CARBONATE—(50% plus Copper)

Two and one-half times as strong as Coppercarb.

5-lb. Bags (6s).....	Each \$1.50	6, 5-lb. \$7.25
----------------------	-------------	-----------------

2% CERESAN

For Sorghum Seed. Reduces seed decay and damping off. 2 oz. per bushel.

(1-Lb... 70c)	(5-Lbs... \$3.00)	(25-Lbs... \$12.75)
---------------	-------------------	---------------------

NEW IMPROVED CERESAN

For Wheat, Oats, Barley for SMUT. It usually increases yield. One-half ounce treats a bushel.

(4-oz... 30c)	(1-Lb. Tin.. 75c)	(5-Lb. Tin.. \$3.25)
---------------	-------------------	----------------------

EVERY FARM SHOULD HAVE A GARDEN

Why Not Grow What You Eat?

A good garden can be maintained on a very small space and will help towards reducing expenses. (See Pages 2 to 33 of Catalog.)

PLANT TREES and SHRUBS For Service and Beauty

Our nursery stock is complete with only First Grade items that are particularly adapted for this country. A wide variety is open for your selection and a careful perusal of Pages 47 to 59 of our Catalog will prove worth your while.

MAKE PERMANENT PASTURES

There are many grasses that can be used for permanent pastures for dry and irrigated sections. Adequate pastures reduce the carrying costs of milk cows and idle stock. (See Pages 64 and 65 of Catalog.)

FIGHT WEEDS

Frequent cultivation will aid in eliminating weeds. Cultivating tends to increase and maintain soil moisture. Weed plants, turned under before they mature seeds, add some humus. Weeds are destroyed by weed-killing compounds such as ATLACIDE CALCIUM CHLORATE. (See Catalog Page 72.) Ask for Weed Control information and For Prices on Larger Quantities.
